

Name: _____

Zoologist Report

You are a zoologist studying an animal of your choice. The only guidelines you need to follow are that the animal can't be extinct, imaginary, or the animal that you researched for the Utah animal report. Please remember that you need to pick a specific animal so if you pick a turtle that interests you so find a specific turtle such as Leatherback Turtle or Green Sea Turtle, etc... Please submit each days PDF when you're done and be detailed with your answers! Make sure you download and save or print it and fill it in so that your work is not lost!

Tuesday 4/21

Basic Animal Facts

My animal:

Why did you choose this animal?

What do you think of this animal? Your feelings/opinion?

Have you ever seen this animal in real life?

Where did you see it?

Would you want to see it in real life? Would you want to hold it or pet it?

Animal's Latin/scientific name:

Lifespan (how long does it live?):

Species:

Choose One: mammal, fish, bird, reptile, insect: _____

Choose One: warm blooded or cold blooded: _____

Population numbers (how many are there? In the wild vs. in captivity?):

Is this animal on the endangered, or protected species list?

Babies: Live birth or eggs? How many do they have at one time?

How do they raise their young?

Describe the baby's stages of life and how they grow up.

What interaction does your animal have with humans?

Is your animal nocturnal?
