### Zoologist Report

You are a zoologist studying an animal of your choice. The only guidelines you need to follow are that the animal can't be extinct, imaginary, or the animal that you researched for the Utah animal report. Please remember that you need to pick a specific animal so if you pick a turtle that interests you so find a specific turtle such as Leatherback Turtle or Green Sea Turtle, etc... Please submit each days PDF when you're done and be detailed with your answers! Make sure you download and save or print it and fill it in so that your work is not lost!

#### **Thursday 4/23**

Habitat:

Describe what their general habitat is like:

List the continents or specific countries where this animal lives in nature:

What kind of habitats do they live in? Desert, tropical forest, ocean....:

What is the weather like in their environment?

Do they migrate or hibernate at all?

What elevation do they live at in general?

What type of home does your animal live in or do they build?

A Day in the Life:

Explain in detail what this animal would do in a day.

What physical and behavioral adaptations does your animal have? Remember that adaptations are what helps the animal to survive.

Interesting Facts:

Find any interesting or fun facts that you weren't able to include anywhere else in the report!
